Rabbit Hopping Agility Rules and Regulations – Introduced 2015

First year to show as exhibition only with following years to be determined.

Rabbit Hopping: is a performance sport where rabbits are directed to run through a course of jumps ranging from 4" to 20" high and are similar to jumps used for horses, but on a smaller scale. The jumps are made with displaceable rails so the rails will fall if a rabbit does not clear the jump. The goal is to go through the course with the least number of faults. There can also be a long jump and high jump that may potentially be challenging for the rabbit.

Rabbit Agility: is much like Rabbit Hopping and can have other similar obstacles such as used for dog agility... Many of these obstacles have contact zones that rabbits can be taught how each obstacle works.

H style harnesses and leashes: are required for all rabbit hopping or agility events. Leashes should be made of similar webbing material as the harness and should be 4' to 6' in length. Retractable, chain and rope leashes are not permitted.

General Rules for Competition:

1. Animal entered may be any breed of domestic rabbit, no pedigree is required.
2. Animals must be at least 4 months of age to compete. Animals younger than 4 months are not permitted in harnesses or on leashes in the showroom.
3. Rabbits must be healthy and free of any disease or parasite, mites, lice, diarrhea, discharge, any open wound, dirty bottoms, feet or fur. Nails should be trimmed. If a rabbit has any of these health issues it will not be allowed in the competition area.
4. Pregnant does are not permitted to compete. In addition, any doe that has had a litter in the

past 8 weeks is not permitted to compete.

5. Animal handlers will be responsible for cleaning up any debris their animal leaves on the competition course during the competition and warm up area.
6. Careless handling of rabbits will result in a warning. Serious negligent handling will result in a disqualification.
7. Rabbits shall proceed through the course and over the jumps voluntarily. Animal handlers are prohibited from forcing or carrying animals through the course, but may lift them over jumps or obstacles, if necessary. Assistance and encouragement may not involve yelling loudly or any other method that would subject a rabbit to excessive stress. Touching your rabbit with your feet is not permitted.
8. Handlers and rabbits are considered a team. A rabbit can only have one handler at a competition. Persons with disabilities may appoint an animal handler for a competition.
9. Handlers will not use the leash to hit a rabbit to get it moving or as a means of discipline. Rabbits may not be lifted with the leash.
10. If, in the opinion of the judge, the rabbit becomes lame or the course is too difficult for the rabbit, the rabbit will be disqualified for its safety.
11. Animal handlers must always use good sportsmanship. Violations will result in warnings and disqualification. It is up to the judge's discretion as to what constitutes poor sportsmanship. The judge's decision is final.
12. Rabbits must be cooped in the small animal barn for the duration of fair.
13. Only one rabbit allowed on the course at any given time.
14. Giant breeds may be put into a separate division, depending on competitor count.
15. A familiarization period may be allowed prior to the start of competition. Each rabbit may investigate each obstacle for a brief time. Three attempts may be made at any obstacle. The order of obstacles in this time period shall not be the order used in competition. The familiarization period shall be supervised by staff.
16. Judges will inspect all equipment prior to the beginning of the show and may modify the requirements to the extent needed to eliminate any unsafe equipment.
17. Animal Handlers are not permitted to step over jumps. They must go around the jump.
18. Beginning and ending jumps must always be present and are not taken into account on scorings. (No faults will be given for displacing rails on these jumps.)
19. The final obstacle must be cleared in the right direction for the clock to stop. Once the rabbit has touched all four feet on the ground after clearing the final obstacle the clock is stopped and the course is then considered complete.
20. Any course which is not a single, straight-line course shall have the obstacles numbered.
21. No treats (for rabbit or handler) will be allowed on the hopping course or in the warm up area.
22. Leashes must be held at all times except when going through a tunnel or tire jump. After each tunnel or tire jump, the leash must be picked up before the next obstacle.

23. Rabbits may not be left unattended outside their coop. Rabbits may not be tied up with their leash.
